

Rehabilitation Appointment Types

Initial Evaluation: \$230

A comprehensive mobility and orthopedic assessment performed by a rehabilitation doctor. Required before beginning any rehab program.

Progress Check: \$110

A doctor exam is billed when it's the first time we are evaluating the patient, when a treatment plan needs to be created or updated, when a medical reassessment is required, when a new concern or issue arises, or when a patient is starting a package—since an Initial Evaluation is required before entering any package.

Nurse Assessment: \$60

A nurse rehab visit is billed when the client is here for a check-in only without treatment, when range-of-motion or mobility measurements are needed, when a home exercise program needs updating, when strength or gait assessments are performed, or when progress is being documented and reported to the doctor.
